STRESA HOLDS INTEREST OF WORLD TODAY

Britain, France and Italy Seek Common Ground for Peace

(Copyright, 1935, by the
Associated Press.)

Stresa, Italy, April 11.—Great Britain, France and Italy today decided to take up as their first concrete problem France's appeal to the League of Nations against Germany's repudiation of the military clause of the Versailles treaty as endangering Europe's peace.

Shortly after Prime Minister MacDonald of Great Britain, Premier Elandin of Italy, had met for their initial conference, a French official indicated France would insist firmly upon the league's acting on the French appeal.

The appeal, it was said, is to be supported by a memorandum stating France's views concerning Reichsfuehrer Hitler's violation of the treaty and suggesting this violation might lead to the danger of war.

Surprising Announcement.

The conference began at 10:30 A. M. with a preliminary exchange of views on the European situation and adjourned for luncheon after the conference voted to take up France's appeal to the league at 5 P. M.

This announcement, which was made to the press by British and French delegates, created considerable surprise as it had been generally understood that the action to be taken at Geneva concerning Germany would hinge to a large extent upon what decision was made at Stresa regarding more secondary subjects.

A canvass of the delegations gave the following picture of their attitudes on the issues confronting the tripartite meeting:

1. German Rearmament: Great Britain is willing to accept Hitler's rearmament declaration and negotiate for further arms limitations; France will make a stiff protest before sanctioning German rearmament; Italy will accept it, but like Great Britain wants an agreement to prevent further expansion of military establishments.

May Drop Locarno Pact.

2. The Eastern Locarno Pact: Great Britain will give it her moral support without actual participation; France is committed to the pact, but is unlikely to go ahead with it; Italy believes it better to let the proposal drop than to prejudice prospects for reaching an accord on other pacts by insisting on it.

3. Rearmament of Austria, Hungary and Bulgaria: All three powers generally favor it, with the strongest proponent.

4. Disarmament: Great Britain desires to keep the world disarmament conference active and persuade Germany to return; France will have nothing of disarmament or limitations of arms without a security pact; Italy believes it is time to give up the "dangerous Utopia of disarmament."

Three-Power Alliance.

5. A Three-Power Alliance: Great Britain is opposed; France wavers toward Great Britain's attitude, although she would like to support Italy's inclination to favor it.

6. The Danubian Pact: Great Britain and France both support Italy, which regards this accord as vital for her future security.

7. Negotiations with Germany: Great Britain believes no hard and fast plan should be thrust on the Reich for her acceptance or rejection, but that she should be asked to negotiate in a later conference; Italy favors an accord at Stresa, possibly an alliance on which to fall back if Germany will not negotiate; France wavers

Choking, Oppressive Sand and Dust Tighten Grip on Suffering Southwest Today

ODDITIES

Picked Up Here and There by The Associated Press

WANTS LESS MAJESTY.

Chicago, April 11.—(AP)—Mrs Dorothy Majesty of suburban Niles Center told Superior Judge Allegretti that her husband, Jacob, after six weeks of married life, broke up a card game at their honeymoon home by firing three shots. Her elbow, she said, was shattered.

The court ordered Majesty to pay: \$15 a week temporary alimony, \$199 hospital bill, \$250 doctor bill.

CAUSE OF WRINKLES.

Seattle, Wash., April 11.—(AP)—When a St. Louis department store ordered a two-ton totem pole, Capt. Addis Gutmann, president of fur company, was perplexed as well as surprised.

The old Indian symbol is 34 feet high, and was placed in Captain Gutmann's store before the building was finished. The problem of removing it brought wrinkles to his brow. It finally was taken out through a skylight.

TO GET THEIR GOAT.

Milwaukee, April 11.—(AP)—It used to be that families in the Third ward would buy a goat every time a new baby was born, and the goats had free run of the territory, but those days apparently are gone forever. Three goats accused of trying to make a meal off a spare tire of a parked automobile were rounded up the other day by a police squad. They were returned to their owners with the warning to keep them penned up, or they (the goats) would land in the city pound.

FIELDS ALL BARREN.

Where in other years at this season, wheat and other crops have spread their checkerboard pattern of green shades over the landscape, there are barren fields without a blade of green, drifts of soil along roads, fences and farm buildings, and deserted highways.

For a month dun-colored clouds have swirled and billowed over what once was known as the nation's bread basket. Hopes for recovery raised earlier this week by promising weather forecasts, were shattered yesterday by a dust blizzard labelled as the "worst" of the series.

As the latest storm roared over Kansas, Colorado, Oklahoma, Texas and New Mexico, the government's monthly crop was released.

Agreement Abandoned

"A large portion of the acreage in this important winter wheat area was being abandoned, it said. The condition of the wheat crop in six Kansas counties—Graham, Gove, Greeley, Wichita, Hamilton and Kearney—was listed as zero.

Kenneth Welch, relief administrator in Baca county, Colorado, said no crops whatever can be expected in southeastern Colorado unless heavy spring rains come.

"I do not see how anyone can continue to live here if these storms continue," Welch added.

"Dust pneumonia is increasing rapidly among children in Baca county because of the unusually severe dust storms of the past few days," Welch said.

Many "Stick It Out"

Some residents are deserting the stricken area, but the majority are determined to "stick it out," either because they have no other place to go or because of hope that better days are coming.

Approximately 100 families have left Cimarron and Texas counties in northwestern Oklahoma. Scores of women and children have been sent from Baca county, Colorado.

A small number of families have left Union county, New Mexico, but outside of that agricultural experts said they had found only one farm family leaving the eastern part of the state because of dust storms and drought.

Yesterday's dust storm closed all schools, forced shopkeepers to close their stores, grounded airplanes and disrupted train and bus schedules. By night the cloud of dust had been carried into Iowa, Missouri and Arkansas.

F.D.R. Promises Help

Meanwhile, at Washington immediate relief for the drought and dust stricken sections was promised by President Roosevelt when a delegation of senators and representatives from four middle western states called on him.

The delegation asked the president to earmark \$150,000,000 for a land program for the next two years. He did not indicate what amount would be allocated, but was said by the delegation to have given assurance that he would permit the expenditure of all the money that was necessary.

"Dangerous practices" exist in the commission's disbursement system by which payments are made from each county, Taylor said. Be-

Huge Liner is Driven Aground by Stiff Gale

Southampton, England, April 11.—(AP)—The Aquitania, 45,000-ton liner, remained fast today on the mud bank in the Solent, onto which she was forced yesterday by a 70-mile-an-hour gale.

Two high tides passed without enabling a fleet of nine tugs to free the mammoth vessel.

State Auditor to Demand Complete Control of Expenditures of IERC or Release From Responsibility

Chicago, April 11.—(AP)—C. R. Taylor, director of the relief branch of the State Auditor's office, announced that Auditor Edward J. Barrett planned to attend a meeting of the Illinois Emergency Relief Commission tomorrow and demand either complete control of disbursements or release from all responsibility.

Wilfred S. Reynolds, secretary of the commission, said the withholding of checks demonstrated, not the number of irregularities, but how irregularities are pre-

Enrollment in Grade Schools Drops While High Schools Mount

Springfield, Ill., April 11.—(AP)—Enrollment in Illinois grade schools dropped 30,268 during the 1934 school year, Superintendent John A. Wieland of Public Instruction announced today, but the number of high school students increased 6,321.

Wieland's statistics showed that 1,384,366 pupils attended grade and high schools last year, with 1,043,458 in the grade schools and 340,878 in high schools.

The number of teachers decreased, totaling 46,361, of which 33,721 were in grade schools.

More boys are in school than girls. Enrollment records show that 539,838 boys and 503,620 girls are in the grades, with 176,743 boys and 164,135 girls in high schools.

STATE FAILS TO SETTLE STRIKE

Conference to End Utili- ties Walkout Contin- ues in Chicago

Springfield, Ill., April 11.—(AP)—State department of labor officials today said they had failed to bring together spokesmen for disputing factions in the Illinois Power & Light Corporation strike, but conferences were being continued in Chicago.

A. B. Becker, arbitrator for the state industrial commission, went to Chicago to consult with Martin P. Durkin, director of labor.

Becker said that in the Centralia-Mt. Vernon district the employees have no grievance against the utility company but are striking on orders of the International Brotherhood of Electrical Workers.

Have Labor Contract

In the central district, including Danville, Champaign, Bloomington and Decatur, Becker reported that the Illinois Power & Light Corporation has a contract providing that it shall be supplied with labor by the Utility Operating Company, a group of employees.

Negotiations have been under way, it was said, to get the utility operating company to affiliate with the electrical workers union and the Federation of Labor.

Becker said he had attempted to negotiate a settlement of the strike but that officials of the Power & Light Corporation and the Utility Operating Company had refused to meet with Michael Boyle, vice president of the electrical workers union.

Becker said he had attempted to negotiate a settlement of the strike but that officials of the Power & Light Corporation and the Utility Operating Company had refused to meet with Michael Boyle, vice president of the electrical workers union.

The report was that 47 employees of the Utility Operating Company are on strike at Danville and 12 at Champaign.

Road Committee to Meet With Governor

Representatives of the good roads committee relative to the modernization of the Lincoln highway passing through this city, will meet in Springfield with Governor Henry Horner, Tuesday, April 16, it was announced today.

Members of the Dixon Chamber of Commerce good roads committee, and members of committees in Sterling, Rochelle, Morrison, and other towns along the route are also expected to be present. Glen Reynolds, secretary of the DeKalb Chamber of Commerce will notify the other committees of a preliminary meeting to be held prior to the Springfield gathering.

For a month dun-colored clouds have swirled and billowed over what once was known as the nation's bread basket. Hopes for recovery raised earlier this week by promising weather forecasts, were shattered yesterday by a dust blizzard labelled as the "worst" of the series.

As the latest storm roared over Kansas, Colorado, Oklahoma, Texas and New Mexico, the government's monthly crop was released.

SKINNER'S PLEA FOR RETURN OF PROPERTY HEARD

Judge Harry Edwards Took Motion Under Advisement

Judge Harry Edwards in the Circuit Court today took under advisement until Saturday morning at 9:30, authorities submitted by attorneys at the hearing on a motion to return to Charles Skinner, certain articles of clothing, claimed to have been taken from his home in Amboy on the night of January 30. The motion was presented by Attorney Harold Nims representing Skinner in the murder action for which he is held without bond in the county jail for shooting Miss Oliver Derwent and John Scott.

The three witnesses called to testify this morning were Sheriff Ward T. Miller, Deputy Sheriff Fred A. Richardson and Acting Postmaster Paul F. Reilly, the latter a former night police officer in Amboy. At the start of the hearing the defense attorney requested that the witnesses not testifying be excluded from the court room and that they be instructed not to discuss the case, which request was granted. Another request was addressed to the court that all testimony be taken by the court reporter. Mrs. Anna Moore, Judge Edwards informed the attorney that this was the usual practice in such hearings.

No Search Warrant

Deputy Richardson was the first witness called. He was asked whether a search warrant was issued before Skinner's home was entered on the night of January 30, to which he replied that he had no knowledge of such warrant. Attorney Nims ten asked the witness if he had refused to consult with defense counsel, upon request, to review the incidents relative to the murder case, to which the deputy replied that he had. Upon questioning the witness testified that he was not in Skinner's house on the night of the shooting and did not see the house entered. He reviewed, in answer to questions, the investigation conducted on the night of January 30, the visit to the Amboy hospital and the bringing to Dixon of a pair of overalls, a pair of socks and the charred remains of a pair of shoes by Sheriff Miller.

Reilly was the second witness. In response to questioning, he stated that he accompanied Sheriff Miller to Skinner's home on the night of the shooting. There was no response to knocks at the door and upon looking through a window, Skinner was seen to be in bed and apparently was awake, he said.

House Was Searched

The door to the Skinner home was forced open and Skinner was taken in custody by the sheriff. The witness told of a trip to the Amboy hospital and the return to Skinner's home to conduct a search for a revolver. He told of finding the overalls, socks and charred shoes, which were turned over to Sheriff Miller. The charred shoes he stated were taken from the heating stove in Skinner's house the morning following the shooting.

On cross examination by State's Attorney Edward Jones, Reilly testified that he went to Skinner's home with Sheriff Miller and other officers after having been notified by the Amboy night telephone operator that a shooting had occurred in the neighborhood and that Charles Skinner was thought to have shot Miss Olive Derwent and John Scott. Attorney Nims objected to this testimony, which Judge Edwards permitted to stand, stating that defense counsel had opened the question.

Sheriff Miller was the third and last witness to testify. He stated that he received word of the shooting about 9:45 on the night of January 30 and with deputies, went to Amboy to investigate. There he met Officer Reilly who accompanied them to Skinner's home. The investigation of Skinner's home, the sheriff stated upon questioning, was the result of information that Skinner was the assailant of Miss Derwent and John Scott.

Trial Begins Monday

Receiving no response to knocks at the door of Skinner's home, the sheriff continued, by the aid of his flashlight, he saw Skinner lying in his bed. The door was forced open and Skinner taken in custody. The sheriff stated that he asked Skinner about a gun and received the reply that he (Skinner) had disposed of the weapon a long time ago. He admitted that overalls, socks and charred shoes were found in his bed. The door was forced open and Skinner taken in custody. The sheriff stated that he asked Skinner about a gun and received the reply that he (Skinner) had disposed of the weapon a long time ago. FULL BENEFITS
TO FARMERS WHO
PLANT NO WHEATAAA Decides on New
Policy for Drought
Stricken Growers

Washington, April 11—(AP)—The AAA today agreed to make full benefit payments to farmers in drought areas who plant no wheat because of adverse weather conditions.

In a previous step to meet drought conditions, the administration announced that spring wheat farmers might plant up to 165 per cent of their base acreage instead of the maximum of 90 per cent.

Wheat adjustment contracts contain a provision requiring farmers to plant a minimum of 54 per cent of their base acreage and a maximum of 90 per cent.

The ruling today by Secretary Wallace waives the minimum requirement where there is evidence that planting of wheat would be a waste of seed because of drought conditions.

The action will be taken only in counties officially designated by the AAA wheat section as drought-stricken areas and then only by county wheat production control committees after individual producers have made application for exemption.

Volva Strikes Back . . .
at Foes in Law Suits

Waukegan, Ill., April 11—(AP)—Bernard Gorick, Volva's political defeat re-echoed outside the idyllic precincts of Zion today as the religious colony overseer struck back at his foes.

Volva filed two libel actions in Lake county circuit court asking \$50,000 damages each from James F. Boyland, head of a Chicago investment house, and the Rev. Thomas H. Nelson, traveling evangelist who preaches at the Grace Mission church in Zion, opposing Volva's Christian Apostolic Catholic church.

Candlelighters' Aid Soc. —Mrs. R. W. Bogue, 509 Galena Ave.

Stated Meeting White Shrine—Masonic Temple.

Saturday

Dixon Woman's Club—Christian church.

THE TWO MINDS

By Joseph Fort Newton

"TWO TYPES of mind are it work in the world, each alaube after its kind, and each without the other will nigh helpless. They are the abstract mind and the concrete mind, the dreamer and the schemer.

The thinking mind is creative, the scheming mind is cunning. The one explores, the other exploits. The one sees the vision but cannot work it out; the other has no vision but looks after Number One.

For that reason the scheming mind is so often self-seeking, while the thinking mind is always self-searching. The one is moved by greed for power and pelf, the other by a hunger for truth and beauty.

Whatever the scheming mind gets it has taken away from others. Whatever the thinking mind discovers it gives to others, since a truth once seen, or a beauty once revealed, belongs to all.

How often we have seen an inventor discover some useful device, only to have it taken away from him by some clever schemer who cheats the thinker, cashes in on his vision, and makes a fortune.

It is in art, in philosophy, in science that we see the thinking

mind at its best. It has opened new windows and let in new light; it has followed the laws of nature and tapped new sources of power.

The scheming mind is seen at its best—and worst—in politics, in business, in diplomacy. Its genius is to outwit its fellows, to gain its own ends by cleverness, and it is content with results.

The thinking mind in science has changed the whole face of the physical life of man for good, but we are only beginning to apply it to the realm of human relationships, in industry and politics.

It is when the two kinds of mind are united in one person, as they were in Lincoln, that we see what can be done. He had the moral insight of a seer and the astuteness of an adept in politics.

So long as we accept, and even glory, the scheming mind, life will be on a low level. The dreamer and the schemer must work together—but of the two the dreamer lives forever, and the schemer dies in a day!

April Meeting St. James Aid Society

The April meeting of the St. James Aid Society was held at the home of Mrs. Henry John with 25 members and eight visitors present. At noon the usual delicious picnic dinner was enjoyed. As this was Charlotte Bothe's birthday, the centerpiece was a large birthday cake for her. At 2 o'clock the meeting was called to order by the president. All joined in singing "He Leadeth Me," and "Juanita". The 24th Chapter of Luke was read, followed by prayer, led by Edna Topper. Roll call and report by secretary and treasurer were given. Several cards of thanks for flowers and gifts were read. It was decided to have a rummage sale soon; place and date to be announced later. The meeting was closed with the Lord's prayer. The program committee then furnished the following program: Vocal numbers by Mrs. Stella Fuqua, readings by Mrs. Hardy, Mrs. Edith Bothe, Mrs. Dorothy Shippert, and little Darleen Shippert. Mrs. Francis Hartzell had charge of the recreation period and conducted several interesting contests. All departed singing thanks for the pleasant day spent at the Johns home. The May meeting is to be with Mrs. August Johns.

Two Will Attend Welfare Convention

The Madison daily paper has the following item of interest, because of the fact that Dr. Masten is a niece of Mrs. H. U. Bardwell and Mrs. E. E. Shaw of this city:

Dr. Mabel G. Maginn and Mrs. Irene Zealley Koehler will represent the Family Welfare and Children's Service Assn. of Madison at the annual conference of the Family Welfare Assn. of America, to be held in Cincinnati April 4-6.

Dixon Couple is Licensed to Wed

(Telegraph Special Service) Chicago, April 11—A marriage license was issued here today to Charles Bott, 606 Cedar street, Dixon, and Mrs. Anna Wachtell, also of Dixon.

Tested RECIPES

By MRS. ALEXANDER GEORGE

HOT CROSS BUNS

(A Lenten Recipe)

Breakfast

Orange Juice

Cooked Wheat Cereal With Cream

Buttered Toast Jam

Coffee

Luncheon

Vegetable Salad

Orange Bread Butter

Sugar Cookies Tea

Dinner

(Meatless)

Cream of Corn Soup Wafers

Buttered Beets

Mashed Turnips

Hot Cross Buns

Head Lettuce French Dressing

Cocoanut Pudding

Coffee

Orange Bread

2-3 cup orange peel, chopped

1 cup water

1-3 cup orange juice

1 cup milk

1 egg

3-4 cup sugar

1-2 teaspoon salt

3-1 cup flour

3 tablespoons baking powder

Cook peel and water 5 minutes.

Cool. Add rest of ingredients and pour into greased loaf pan. Let

rise 15 minutes. Bake 50 minutes in moderately slow oven.

Hot Cross Buns

(With Currants)

1 cake compressed yeast

2 tablespoons warm water

1-3 cup sugar

1-3 cup sugar

1 teaspoon salt

1-2 cup currants

1-2 teaspoon cinnamon

1-2 teaspoon cloves

1-4 teaspoon nutmeg

1 egg

1 cup hot milk

4 tablespoons fat

3-3 4 cups flour

Crumble yeast, add warm water and 1 tablespoon sugar. Add fat to milk and cool until lukewarm. Combine ingredients and add rest of sugar, salt, spices, egg and 2 cups flour. Beat 3 minutes. Add rest of flour. Cover and set in place of moderate temperature (72 degrees). When dough has doubled in size (in about 4 hours), roll out on floured board until dough is 1-2 inch thick. Cut out buns 1 1/2 inches in diameter. Arrange 1-3 inch apart on greased baking sheet. Cover with cloth and allow to double in size (about 2 hours). With back of knife press crosses on top of each bun. Bake 15 minutes in moderate oven. As soon as removed from oven, brush melted butter over tops. Serve warm or cold with butter.

If desired frosting can be placed in the "crosses" when buns are cool.

ROYAL NEIGHBORS

WILL MEET TONIGHT

The N. R. A. No. 127, will meet in Union Hall tonight at 8 o'clock. A good attendance is desired as imported business is to be transacted.

Officers Congress Parents-Teachers Nominated Today

Peoria, Ill., April 11—(AP)—A slate of officers selected at the 36th annual convention of the Illinois Congress of Parents and Teachers, headed by Mrs. Arthur R. Williams, Normal, as president, was expected to meet no opposition in balloting today.

Mrs. F. L. Holch, Glen Ellyn, was nominated as first vice president to hold office with Mrs. Williams, for another year.

Other nominees included: for vice presidents, Mrs. Russell Shriver, Charleston, second; Mrs. Thomas B. Stephenson, Chicago, third; Mrs. John J. Ora, Chicago, fourth; Mrs. Paul E. Madden, Urbana, fifth; and Mrs. V. L. Bowman, Aurora, sixth.

Mrs. Shriver was nominated for a one year term to fill a vacancy and others were nominated for two year terms as was Mrs. Edwin G. Nichols, Chicago, the committee's choice for secretary.

Practical Club At Rickard Home

The Practical Club met on Tuesday, April 9th, at the home of Mrs. Clark Rickard with a good attendance of members and two guests.

The paper of the afternoon was very ably given by Mrs. W. E. Whitson her subject "Soviet Babies" was written by Dr. William Seaver Woods. Mrs. Homer Sennell conducted a very interesting quiz. At the close of the program delicious refreshments were served closing a very delightful afternoon.

Will Sponsor Easter Dance

The congregation of St. Patrick's Catholic church will sponsor an Easter dance to be held the Monday evening following Easter, in Rosbrook's hall.

A good seven piece orchestra will furnish the music. No doubt there will be a record breaking attendance.

Entertained N. R. A. Club on Tuesday

Mrs. Lillie Buchanan entertained the N. R. A. Club at her home on Tuesday evening.

A chop suey supper was served. A short business meeting was held and new member welcomed. Bunco was played, prizes being awarded to Marie Wilson, Christina Haynes and Mabel Stetson.

Surprise Party For Mrs. C. Becker

On Monday evening a group of friends held a happy surprise for Mrs. Carl Becker at her home in N. Dixon, honoring her birthday.

Friend husband was aware of the plotting and planning and gave his assistance where he could and the lady of the house was thoroughly surprised on the arrival of her guests. Then four tables of bridge were formed and the evening hours sped all too rapidly.

Mrs. Wilbur Winn won the favor for high honors for the ladies and Mrs. Lee Poite was the consolation favor.

Mrs. Wilbur Winn was awarded the honor prize. Refreshments were served and enjoyed and afterward the ruga were rolled back and dancing was enjoyed until a late hour.

A number of gifts were presented Mrs. Becker by those present, and everyone expressed the wish that her birthday be many and happy, after spending a most delightful evening at the Becker home.

Supper for Fliers At Schnell Home

On Tuesday evening Mr. and Mrs. Reinhardt Schnell delightfully entertained the fliers of the Dixon Airport at their home at the airport.

The home was tastefully decorated with model airplanes and the table was daintily decorated with gay spring flowers and airplane favors.

A sumptuous chicken dinner was served at 6:30 to twelve fliers who did a great deal of ground flying during the dinner, and afterwards much was said about new model planes, and new ideas they expect to take up during the summer months, to make the Dixon Airport hum with activity.

Out of town guests at the dinner included George Fruitt and Donald Butler of Franklin Grove and Dr. Lamberton and Robert Bressler of Oregon. At a late hour all departed voting Mr. Schnell an ideal host.

OF INTEREST TO THOSE APPEARING IN MUSICAL FESTIVAL

The Dixon Women's Club wish to announce that all contestants wishing to appear on either afternoon or evening program for the coming Musical Festival, May 10th, at the Masonic Temple must phone Mrs. Harry Edwards, 1380, or Mrs. Elizabeth Jenks, A1267, not later than April 18th.

Carlton Smith's Address Is Greatly Enjoyed by Phidians

The Phidian Art Club enjoyed a stimulating afternoon with every good attendance present.

The officers were escorted to their stations by the color bearers. The secretary and treasurer gave their reports. The auditors' report was given by Esther Walder and found the books in splendid condition.

In presenting various experiences, Mr. Smith discussed personalities, publicity and politics, in a humorous and most engaging manner.

Of artists in the musical world, Mr. Smith discussed at length Stokowski, Mary Garden and Mme. Shumann-Heink.

As musical counsel for an advertising agency, Mr. Smith was able to present an amusing account of the organization of radio programs. While all people are of interest, a comparative few are outstandingly natural and stimulating. In this latter group Mr. Smith mentioned Laurence Tibbett and Henry Ford.

Then was served by the hostess, Mrs. Warren G. Murray, assisted by Mrs. George Shaw, and Mrs. Wilson Dysart.

The next meeting will be on April 16th, with Mrs. Frank Edwards. Miss Nichols will have a paper on "The Cinema."

WAR DEPENDS ON WHAT WE DO IN PACIFIC

Sherwood Eddy, who has devoted a good part of his life to a study of the Orient, returns from the Far East with the warning that proposed maneuvers near the Aleutian Islands by the United States navy this summer will bring us closer than ever to war with Japan.

Mr. Eddy thinks it by no means a coincidence that plans for these maneuvers were announced by naval authorities on the very day that Japan formally denounced the Washington naval treaty.

He points out that the territory involved is exceedingly close to Japan, and remarks that any slight accident to one of our ships—an explosion, for instance—might easily be blamed on some Japanese super-patriot and lead to war.

"Many of us," he says, "believe that the Aleutians are the right place to hold maneuvers for those who want war, but the wrong place for those who want peace."

And that remark, in turn, points to the most peculiar feature of American-Japanese relations. The ordinary American does not know whether he wants war or peace in the Pacific; or, to be more exact, he does not know whether he prefers to support a war-like or a peaceful policy.

As things are now, we are drifting—drifting in the direction of war. Most of us don't like the idea, but we can't see just what we should do to reverse the trend. And yet it is really quite simple.

In the last analysis, it boils down to a question of what we are willing to stand for in connection with Japan's course in China.

Japan is moving steadily toward the establishment of something very closely resembling a protectorate over China. Seizure of Manchukuo and Jehol, offer of loans to Nanking, and warning to other nations to keep their hands off—all are part of this one design.

What we need to do, as soon as possible, is make up our minds once and for all whether we are willing to fight to prevent such a thing.

If we are, then we should go ahead on our present course, building up our fleet, holding extensive maneuvers in Pacific waters, and preparing to give a good account of ourselves when the day comes.

If we are not, we should stop acting as if we were. We should pull in our horns, keep our navy close to our own coast, and let the Japanese know that they can go ahead on the course they have laid down.

If we keep on drifting, we may have to make our decision suddenly, in a time of crisis, when sober thinking is impossible—make it, in fact, without ever exactly realizing just what the basic point at issue is.

FORGOTTEN IN PRISON

Gov. Mike Conner of Mississippi has discovered that the "forgotten man" has a number of representatives in prison.

Many convicts, he found, are overlooked by the parole board because they have no money, no family, and no friends to bring their cases before it.

They may deserve release just as much as the men who are paroled, but because everybody has forgotten about them, they get no consideration.

In an effort to set matters right, Gov. Conner has been personally interviewing such convicts. Altogether, he expects to hear at least 150 long-termers tell their stories.

His action reflects credit on him, and also indicates a weakness not uncommon in parole systems. Whether a prisoner is paroled should not depend on the influence he can muster.

It is the board's responsibility to examine all prisoners' cases without waiting to be prodded.

WAY TO STOP BILLBOARDS

The fight against the billboard nuisance is usually hampered by the fact that the billboard is erected on private property and is therefore held to be very nearly outside the scope of regulatory laws.

However, Nature Magazine points out that the Massachusetts Supreme Court recently handed down a decision ruling that a society which has the power to regulate against offenses to the nose and the ear has also the power to regulate against offenses to the eye.

The court is explicit in holding that the billboard industry does not possess an inalienable right "to use private land as a vantage ground from which to obtrude upon all the public traveling upon highways, whether indifferent, reluctant, hostile or interested, an unescapable propaganda."

Those are welcome words, indeed. The decision is a landmark in the long fight to rid our countryside of its distressing eyesores.

GERMANS GO ON FLYING

The crash of the Macon seems to have convinced most Americans that it is useless for us to experiment any longer with dirigibles. But it is worth notice that the Zeppelin people are even now completing a new airship at Friedrichshafen, and that they are planning to put it into regular commercial service between Europe and America next summer.

This new ship will be larger than the Macon, will accommodate 50 passengers, and will be inflated with a combination of hydrogen and helium which will make it non-explosive. Her motors will be of the Diesel type, burning fuel oil far less inflammable than gasoline.

Construction of this ship is just one more bit of evidence that the Germans seem to have no trouble at all in making a practical, useful carrier out of the dirigible. Why they should be so successful when every other nation has no success at all at the job is one of the queer puzzles of modern times.

READ THE STORY THEN COLOR THE PICTURE!

When Duney jumped up to his feet, he said, "That trick was pretty neat. I didn't know the monkey had a glove tied to his tail."

"I thought I'd tickle the little pest, but, though I did my very best, the monkey won the boxing match. I guess I'm getting stale."

"Well, anyway," said Dotty. "You were game, and pretty clever, too. The monkey simply was too fast. He ducked each blow you tried."

"Perhaps you'd like to try some more. Much better luck may be in store." "Oh, no! I think I have had enough. I am quitting," Duney said.

The monkey then walked to the lad, and acted as if he felt bad. He put one of his paws out. Duney shook it with a grin.

"Congratulations," he cried out. "You won our little boxing bout. You had to be real good to fight a lad like me, and win."

The monkey owner then cried,

"I will gladly let you come along. Hop on the cage. It is good and strong," exclaimed the monkey owner.

"This trip you will not regret."

"Of course you won't," the giant said. "I will miss you all, but go ahead. You never will forget the good times we have had, I'll bet."

(The Times reach a strange tent in the next story.)

Say, it is time that we are on our way. Get back into the cage, there, monk! You have had your share of fun."

The monkey did as he was told, still feeling pretty brave and bold. The other monkeys welcomed him. They knew what he had done.

Soon Scouty said, "I have a thot that tickles me. I think we ought to join the monkey owner on this trip wherever he is bound."

"We'll walk, or maybe we can all ride." "I will choose the latter," we Duncy sighed. "And I just hope that through the trip, some new place can be found."

"I will gladly let you come along. Hop on the cage. It is good and strong," exclaimed the monkey owner.

"This trip you will not regret."

ROCHELLE NEWS

By Arthur T. Guest

Rochelle — The City of Rochelle has the opportunity to take advantage of the Federal Housing Administration program now being so effectively used throughout the United States.

The plan provides for loans to property owners to make necessary repairs on their property or to build or make additions.

At the organization meeting held in the council rooms in the city hall, Wednesday afternoon, called by Postmaster F. J. Tilton, Robert Giardino, field representative of the Federal Housing Administration explained the situation and outlined the method. The following committees were appointed:

Community Housing Program Under Federal Housing Act.

GENERAL CHAIRMAN

F. J. Tilton.

Executive Committee

P. R. Diederich, Chairman; L. S. Argall, Ed W. Morgan, T. F. O'Neill, L. W. Cecco, C. A. Hills, C. P. Unser, W. J. Houston and Phil May.

Building Industry Com.

C. A. Anderson, Chairman; John Powers, C. G. Oakes, H. J. Phelps, Ed Slothower, B. V. Baker, and D. Mutton.

Publicity Committee

A. T. Guest, Chairman; Fred E. Lux, Joseph Askvig, C. E. Kepner and John W. Tilton.

Loan Committee

D. W. Taylor, Chairman; A. T. Guest, J. M. Weeks, P. R. Diederich and T. C. Kelly.

Finance Committee

G. R. Harrison, Chairman; John D. Sweeney, W. F. Virke, Sam Hamaker and C. A. Anderson.

Campaign Manager

Ben L. Berne.

Definite appointment of the committees was made at the Rochelle Business and Professional Men's dinner at the Hotel Collier Tuesday night.

Tuesday night committees met for 6:30 dinner at the Hotel Collier to hear the details of the finance plan.

The plan contemplates a thorough canvass of the City of Rochelle to determine the work that can be done and to interest those who will agree to do it. It is a fine opportunity to put a new roof on your house, apply a much needed coat of paint or to make other repairs.

Carroll H. Sudler is FHA director for northern Illinois, and L. R. Putnam, is associate director for this district.

Any property owner with the proper character and income status, according to Mr. Sudler, can now obtain a modernization loan up to \$1,000 on a note with no other security than his own signature and repayable monthly over a period of up to five years.

The plan will keep a steady flow of money in the community and will ease the unemployment problem.

Miss Lucille Arends of Rochelle was elected 1935 American Legion Queen Saturday night, when the contest officially closed polling 1,203 votes. Her ladies in waiting will be Miss Anna Pleitner who registered a vote of 834 and Miss Anna Freed of Oregon, whose vote was 273. Other young ladies who were given a fine complimentary vote were Miss Rosalyn Hill of Creston, Miss Charlotte Bienfang, Rochelle, and Miss Pearl Tesmer, Esmond. The date for the crowning of the queen and awarding of the prizes will be announced later.

The American Legion membership drive is making very satisfactory headway. Twenty-one membership cards were sent to the state department headquarters on Sunday bringing the membership of the post to 90.

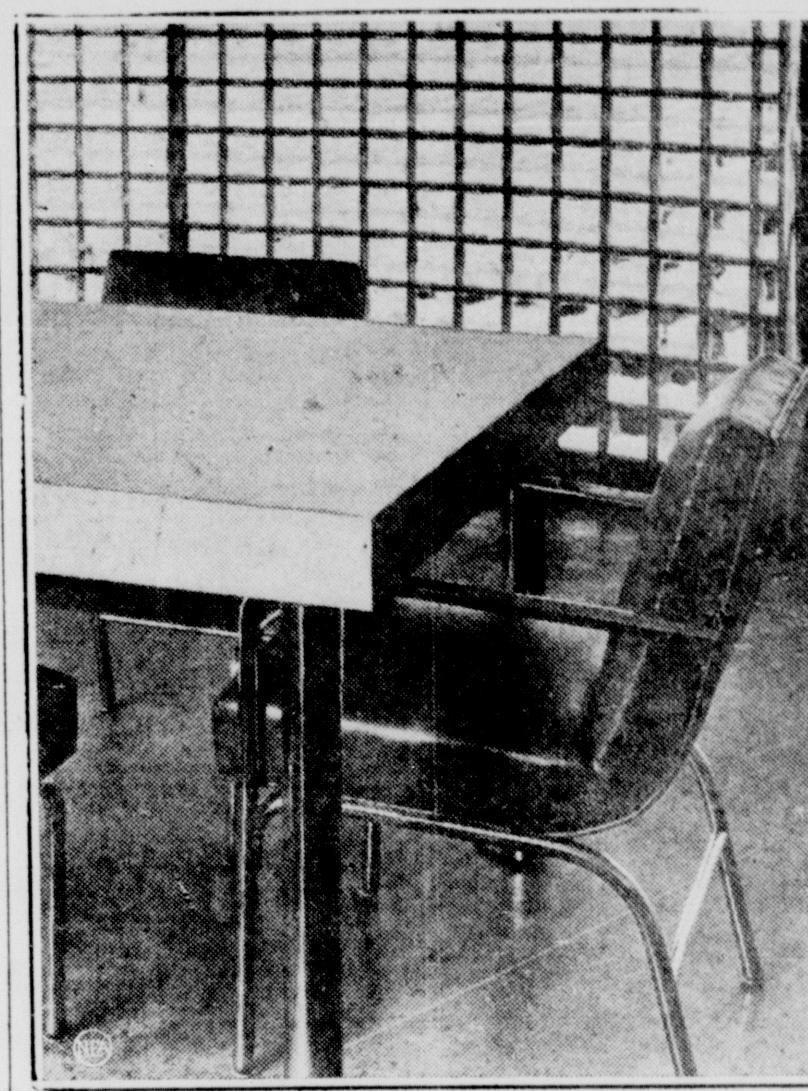

Due to the extreme wind and cold the Blackhawk Voiture No. 408 of the "40 and 8" did not make the trip in their locomotive and although Commander Arthur T. Guest was at the city limits to escort the couriers they slipped in unnoticed in a car and the cards were mailed instead.

The American Legion Auxiliary is making good headway in their membership drive and the unit now has 70 members. An official board meeting was held with Mrs. A. T. Guest, Wednesday night. Eighteen committee members attended.

Rochelle Post got behind the Harold Smith benefit and was instrumental in selling a number of tickets. This benefit dance was given in the Kings Community Hall April 8th, and Al Lind's orchestra furnished the music. Legion colors were used on the platform. Refreshments of ice cream, cake, pie

HOUSEWIFE PUT ON HER METAL

Endless Variety of Gleaming Plated Furniture and Fixtures Replaces Pioneer Iron Beds

Sea-green glass tiling forms the wall background for this modern dining room furniture. The center of the table is glass covered to provide a unique lighting effect. The chairs are green leather upholstered on chromium plated frames.

(NEA Service Staff Correspondent)

New York—The white-enamelled iron bed of the nineties dreadful as it would seem to the decorator of today, yet played a useful role—that of ancestor to all the metal furniture which is now displayed in the modern house from parlor to kitchen.

Manufacturers have learned a lot about metal since the iron bed days. In the interim, thousands of dollars have been spent in laboratories to work out alloys that will be pliable as well as stain and rust-proof. The result has been to put metal into all the rooms of the home.

Carroll H. Sudler is FHA director for northern Illinois, and L. R. Putnam, is associate director for this district.

Any property owner with the proper character and income status, according to Mr. Sudler, can now obtain a modernization loan up to \$1,000 on a note with no other security than his own signature and repayable monthly over a period of up to five years.

The plan will keep a steady flow of money in the community and will ease the unemployment problem.

Miss Lucille Arends of Rochelle was elected 1935 American Legion Queen Saturday night, when the contest officially closed polling 1,203 votes. Her ladies in waiting will be Miss Anna Pleitner who registered a vote of 834 and Miss Anna Freed of Oregon, whose vote was 273. Other young ladies who were given a fine complimentary vote were Miss Rosalyn Hill of Creston, Miss Charlotte Bienfang, Rochelle, and Miss Pearl Tesmer, Esmond. The date for the crowning of the queen and awarding of the prizes will be announced later.

The American Legion membership drive is making very satisfactory headway. Twenty-one membership cards were sent to the state department headquarters on Sunday bringing the membership of the post to 90.

Due to the extreme wind and cold the Blackhawk Voiture No. 408 of the "40 and 8" did not make the trip in their locomotive and although Commander Arthur T. Guest was at the city limits to escort the couriers they slipped in unnoticed in a car and the cards were mailed instead.

The American Legion Auxiliary is making good headway in their membership drive and the unit now has 70 members. An official board meeting was held with Mrs. A. T. Guest, Wednesday night. Eighteen committee members attended.

Rochelle Post got behind the Harold Smith benefit and was instrumental in selling a number of tickets. This benefit dance was given in the Kings Community Hall April 8th, and Al Lind's orchestra furnished the music. Legion colors were used on the platform. Refreshments of ice cream, cake, pie

Shows Damage Less

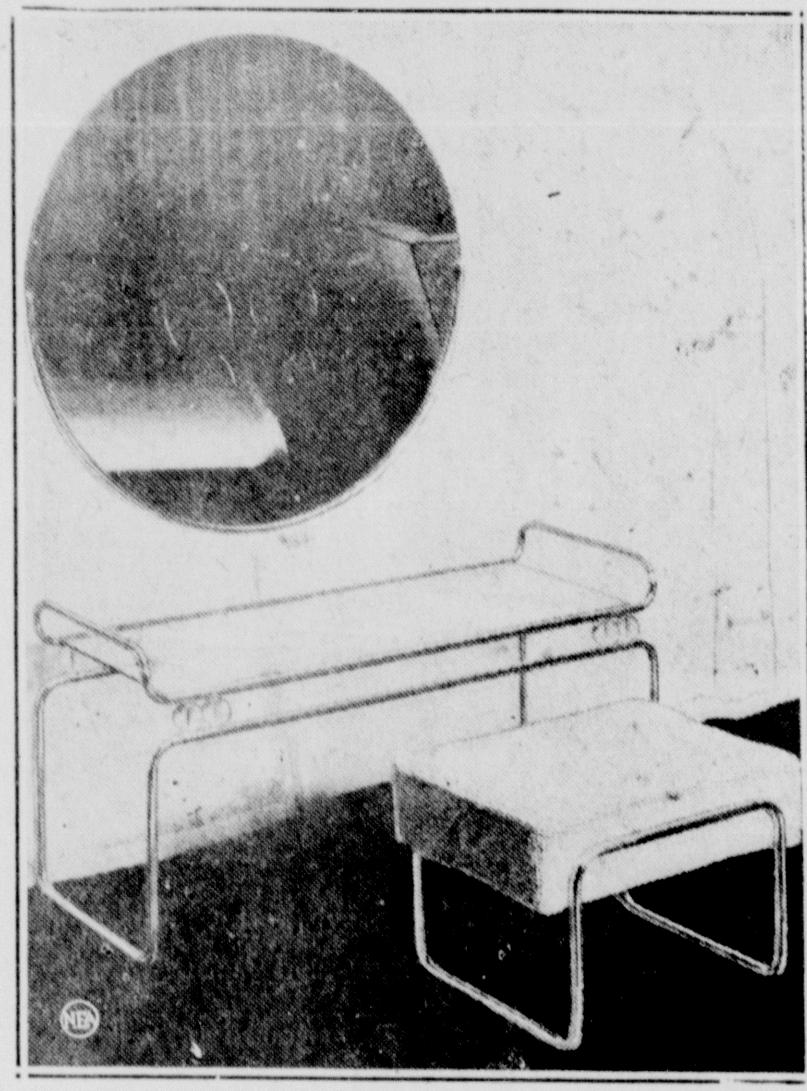

Kitchen and table utensils have followed the trend toward gleaming metallic surfaces, as is shown in these articles designed by Russell Wright.

At top is a tea set, multiple double boiler and (right) an insulated ice cube container. Below are a copper candle holder and table lamp.

executed that they fit into the luxurious scheme.

Built in glass shelves and a buffet of macassar-ebony wood and a white lacquer constitute the only other furniture of the room. The metal note is repeated in the metallic handles of the buffet drawers, and sea-green glass bricks, in back of the dining table, furnish another modern decorative note.

Throughout this house metal has been used in many of the rooms, especially in the case of coffee tables with glass or metal tops, important for serving not only coffee but tea and cocktail. Metal in these cases has the advantage of being unbreakable, light and impervious to ashes, hot water or alcohol. Also, the various metal alloys have

Both mirror and dressing table are composed of glass and chromium plated metal, and the comfortably upholstered seat is supported by a gleaming frame. These articles emphasize the progress in metal work since old-fashioned iron bedstead days.

there are innumerable aluminum serving and hors d'oeuvre trays, caskets, yet light as air and a boon to the hostess who must serve her own.

Few hostesses go to the lengths of one who had her ancient solid silver tea set chromium-plated in her enthusiasm for the metal but aluminum, copper and chromium are certainly being used a great deal for coffee and tea services.

Strength Favors Metal

Indestructible mushroom lamps of copper, shades and all provide colorful and practical lighting for places like children's playrooms or adult game rooms where much activity goes on. And then, of course

there are innumerable aluminum serving and hors d'oeuvre trays, caskets, yet light as air and a boon to the hostess who must serve her own.

Its natural strength is the greatest virtue of metal in household design, says Russell Wright, who has used aluminum extensively in casseroles and baking dishes so ornamental that they may be used for table service. Mr. Wright points out that so far it is difficult for Americans to take their metal straight. They still like it oxidized or covered with colored enamel—a slightly degenerate taste which Mr. Wright trusts will pass.

SCHOOL LOYALTY BILL REJECTED AFTER HEARING

Committee of Illinois
Senators Recommends
Defeat of Measure

Springfield, Ill., April 11—(AP)—Taking the advice of college presidents, the senate revenue committee has rejected the "school loyalty bills" sponsored by Senator Charles W. Baker, Monroe Center Republican.

A "do not pass" recommendation, by a vote of 6 to 4, was given the bills after a group of educators denounced the proposals at a committee hearing last night.

The bills were designed to penalize Communistic teachings which, Baker charged, were occurring in many institutions. One proposal was to withhold appropriations from any tax-supported school where there was evidence of instruction contrary to principles of American government.

The other bill provided that no exemption from taxes would be allowed schools not supported by state funds where such teachings took place.

Passed Two Years Ago
Baker introduced similar bills two years ago as the outgrowth, he said, of a small riot staged in the State House in which, he claimed, a college professor participated. The bills then passed the senate but died in the house.

President Walter Dill Scott of Northwestern University contended Baker's proposals would primarily make the schools agencies for indoctrination—telling the students what to think and training them to accept existing conditions, contrary to the present philosophy of education.

He declared that under the measures, a large university would be wrecked on the biased judgment of the tax assessor. Scott said the progress of education depends upon high ideals of freedom and to that end the Baker bills were of no benefit.

Prof. Charles E. Merriam of Chicago University declared there was no need for such bills and that they were vague and confusing. He said the present laws provide for punishment of any teacher and the bills were unfair by causing the institution to suffer because of the possible wrong-doing of a single instructor.

Schools Called Barriers

Merriam said the schools were the greatest barriers against the teachings aimed at by the Baker bills, declaring that when a gag is clamped on teachers and schools American democracy was near an end.

The Rev. E. V. Cardinal, president of St. Viator College, objected to the bills on the grounds that, in event of passage, other bills might follow which would tax institutions out of existence.

Others declaring the bills were harmful and unnecessary included F. C. Woodward, vice-president of Chicago University; C. L. Lyons of Eureka, president of the Federation of Illinois Colleges; Frederick R. Hamilton, president of Bradley Polytechnic of Peoria; and John C. Hessler, president of James Milliken University of Decatur.

Little and Big
Man, What Now?

Dramatically fashionable is this black taffeta wrap with puffed sleeves and the new below-the-hip-length blouse. Petit point has gained vogue for bags and vanities like that above.

RIGHT: The cut-outs at the collar and arms are effective touches on this smart evening gown. Of bright red crepe, the back is cut low at the waistline. Rhinestones and crystal ornament it.

DAILY HEALTH

AMEBIASIS AND DIET

The recent epidemic of amebiasis, as it is better known, amebic dysentery, in one of the capital cities of the country, drew the public's attention to this comparatively uncommon but serious condition.

Amebiasis has troubled medical science no end. One of the peculiar characteristics of the disease is its varied clinical picture. In some

persons the disease runs a rapid and destructive course. In others the disease remains in a chronic state for years.

What are the factors that account for this variability in the clinical and pathological pictures of the disease? Some interesting contributions recently have been made to this problem. These contributions are not only of interest and value in relation to amebiasis, but also in relation to diseases in

general. For once again the experiments affirm that in diseases produced by invading parasites (viruses, germs and other agents), the soil, that is, the condition of the host or the victim of the disease, as much affects the resultant disease picture as the invading disease agent.

Experience has shown that persons who have been on a restricted diet and particularly on one rich in carbohydrates (sugars and

starches), suffer more violently than those who have had a full diet and one low in carbohydrates.

Now experience has been fortified by experimental data. Dogs were inoculated with the amebic parasite and different ones fed different diets.

It was found that feeding raw liver or liver extract in adequate amounts to infected dogs caused a rapid and definite clinical improvement in the disease condition. Cod-liver oil also was shown to have a beneficial effect. On the other hand, dried hog stomach and canned pink salmon rather aggravated the condition.

The facts are there, but the interpretation is difficult. One thing appears to be certain: diet influ-

ences the "soil", and the condition of the "soil" affects the disease.

Tomorrow—The Problem of Diabetes

SCARBORO NEWS

SCARBORO — John Thompson who has been spending the winter in this community is arranging to go back to his home near Ellsworth, Iowa, this coming week.

Circle No. 2 of the Ladies Aid will meet at the church parlor with the committee composed of Mrs. Durin, Mrs. Cave and the pastor's wife, Mrs. Walter.

Anita Smith is ill with measles. Raymond Herrmann, son of Wil-

liam Herrmann, is very ill at Shabbona and according to late reports is slowly gaining his strength.

James Cave is home again this week end from his studies at Na-

perille.

Mr. and Mrs. E. H. Ellsworth

were shopping in Rochelle Monday afternoon.

WOMEN PIQUED AS MEN STEAL AQUATIC MEET

Medica, Kiefer Crack Two World Tank Records

Chicago, Apr. 11—(AU)—Women, always accused of pushing their way into men's affairs, arose in a mild rebellion today to keep their swimming championships closed to men, notably to those record destroyers, Jack Medica of Seattle, Wash., and Adolph Kiefer, 16-year-old Chicago school boy.

At the annual women's indoor championships opened at the Lake Shore athletic club long course pool last night, 17-year-old Katy Rawls, the "Miami Minnow," streaked away with two championships—enough for any headline writer—but interspersing her great performances came Medica and Kiefer to shatter world records in the 300-yard free style and 400-meter back stroke. They simply stole the show and the applause of the crowd.

"I don't know why the men swim in our meets," said Charlotte Epstein, coach of the New York swimming association. "I suppose they compete so the girls can catch their breath, but there are a good many girls who could stage exhibitions to keep the crowd's interest. I'd like to see a women's championship closed to women. So would a lot of the other women."

Cracks World Mark

After four attempts, Medica finally cracked the world's mark in the 300 yard free style, swimming the distance in 3:04.4 as compared to the former record of 3:06.8 established by James Gilhula of the Detroit athletic club.

Kiefer swam the 400-meter in 5:17.8, clipping 12.6 seconds off the world mark set by M. Kiyokawa of Japan.

Miss Rawls won her championships with great performances in the 100-yard free style and 300 yard individual medley, although her feats were overshadowed by Medica and Kiefer. The 100-yard free style was the closest in the meet's history and resulted in a bare foot advantage for Katy over 16-year-old Betty Lee of the Washington A. C., Seattle. Leonore Kight of the Carnegie Library club, Homestead, Pa., was third in the blanket finish. It took a new meet record for Katy to turn the trick. Her time was 1:03, only three-tenths of a second

off Helene Madison's world mark and one-tenth of a second under the meet mark established yesterday afternoon in the trials by Dorothy Dickinson of the swimming association, New York. Miss Dickinson led until the final turn but injured her right shoulder on the twist for home.

In the medley, Miss Rawls won almost as she pleased in 4:09.6 bettering her own national mark of 4:12.2.

MAN POWER IN A. A. U. TOURNEY 28,000 POUNDS

Oklahoma City, Apr. 11—(AP)—Twenty-eight thousand pounds (roughly) of strong, silent men men from Bangor to San Diego stepped on the scales today for the final formality before the gates opened on the National Amateur Athletic Union wrestling tournament.

First action of the three-day performance was on the bill for this afternoon.

There have been no outspoken pre-tournament challenges against the edge the dope gives three Oklahoma schools, but the disputants are here from Iowa, Massachusetts, Maryland, California, Kansas, Minnesota and points between, who will be shown.

Pairing was delayed until the last hours because of the late arrival of some entries, nearing 200 last night.

Department of Commerce figures indicate that for the last 5 1/2 years every 29 days see an airline pilot crash to his death.

OVER THE TOP AT BECHER'S—AND NOT A SPILL!

Notorious Becher's Brook, famed hazard of the Grand National Steeplechase course at Aintree, didn't prove so troublesome as the field leaped this barrier the first time around the four and a half mile route. Here is an excellent action picture taken as a good share of the contestants shot over the jump. Note that the horses have leaped over a hedge higher than their heads. Reynoldstown, an outsider, won; Blue Prince was second, and Jock Whitney's Thomond II was third.

HARVARD PREXY MAPS ATHLETIC POLICY TODAY

He May Endow Athletics and Eliminate Minor Sport

Cambridge, Mass., April 11—(AP)—Traveling along an endowment course mapped by President James B. Conant, Harvard sports seemed headed today for an intercollegiate Utopia, where football gate receipts will be of minor importance.

Stressing the necessity of removing the danger of another drastic loss of football receipts, which he said "hangs over our head like a sword of Damocles," Dr. Conant outlined the policy to place the entire Harvard athletic program on the same basis as all other university activities, which are largely supported by endowments.

Dr. Conant pointed out, however, that this plan would not be completed for many years. He predicted that the near future would find Harvard equipped with a fund large enough to provide income for a quarter of its athletic budget.

which amounts to \$365,000 this year.

To Build Up Fund

"The president and fellows," he told members of the student council, "have agreed that they will endeavor to build up during the coming years an endowment fund for athletics, a capital fund the income of which will eventually become the support of intercollegiate and intramural sports."

This year, due to a \$20,000 reduction in the athletic budget, support will be withdrawn from the Harvard golf team and during the next three years six more minor sports, cross-country, lacrosse, soccer, wrestling, boxing and fencing will be crossed off the H. A. A. list.

Dr. Conant said those sports now cost about \$20,000 a year and that such a comparatively small number will take part in them that the average cost per participant is about \$125.

Invite Bob Becker to Address Meeting Here for Gun Club

Bob Becker, probably the most outstanding authority on outdoor life in the country, author and writer of fish and game conditions for the Chicago Tribune, has been invited to address a public meeting in Dixon under the sponsorship of the Rock River Valley Rod and

Gun Club. Mr. Becker, whose daily articles are read by many sportsmen of this locality, has accepted the invitation in a communication received by President Donald Ortigiesen today.

Two dates for his appearance here for an illustrated lecture with motion pictures were submitted. A meeting of the club members and any sportsmen who are interested has been called for Friday evening at 7 o'clock at The Telegraph building on East First street to select a date and to name committees, who will be in charge of the event.

The general public will be invited to attend a banquet at which time delegations of sportsmen's organizations from northwest Illinois

and any who are interested in the propagation and preservation of fish, game and outdoor life will be welcome to attend. The banquet will be followed by the illustrated lecture by the esteemed visitor.

CULBERTSONS STRENGTHEN BRIDGE LEAD

Sims Chances For Victory Grow Slimmer

New York, April 11—(AP)—P. Hal Sims' chance for victory in his 150-rubber bridge match with Ely Culbertson existed today only as a bare possibility.

The portly bridge master of Deal, N. J., faced a virtually insurmountable lead as the match entered its second last day today, with 17 more rubbers to be played.

Culbertson and his wife, Josephine, withstood a determined assault by Mr. and Mrs. Sims in yesterday's play and brought their advantage up to 14,720 points at the end of the 133rd rubber. Early in the night the Sims had cut the lead to 10,210 points, only to have the Culbertsons start a new upward swing that gave them a net gain for the day of 1,020 points.

Today, for the first time since the match started, Mrs. Culbertson and Mrs. Sims will not play. Mrs. Culbertson is taking the day off to be present at the birthday celebration of her son, Bruce, who is six years old.

Culbertson will have Albert H. Morehead as his partner and Sims will play with B. Jay Becker of Philadelphia in the afternoon session.

Eleven rubbers were played yesterday and last night, the Sims winning six and the Culbertsons five. The Culbertsons lead in rubbers, 73 to 60, and in points, 111,330 to 96,610.

burgh Yellow Jackets repeated as U. S. amateur hockey champions by defeating Fort Pitt Hornets, 2-1, in Pittsburgh.

4000 WITNESS A. A. U. BOXING INITIAL BOUTS

Future Ring Timber Is Expected To Be Revealed

St. Louis, April 11—(AP)—Heavy and light-heavies, battling in the classes from which the Joe Louis step out of amateur pugilism into the money, moved to the forefront of the National AAU senior boxing championships today after watching the little fellows produce four genuine knockouts and seven of the synthetic variety in 59 bouts in the lighter classes.

Before a crowd of 4000 in the St. Louis arena, the matted maulers from all sections of the country pounded their way through 52 first round and seven second rounders last night.

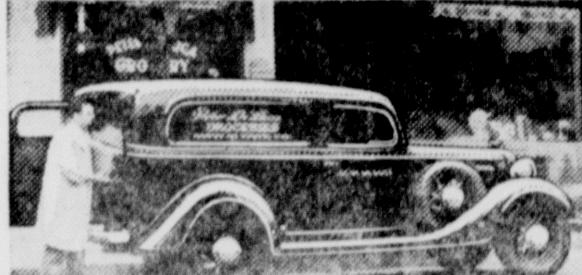

Hammers Out Technical KO

George Cirimelli, San Francisco bantamweight, marked himself as a likely contender for the 118-pound title by hammering out a technical knockout over Ike Gaunt, Ft. Wayne, Ind., and following with a decision over Carlyle Lovrud, Minneapolis.

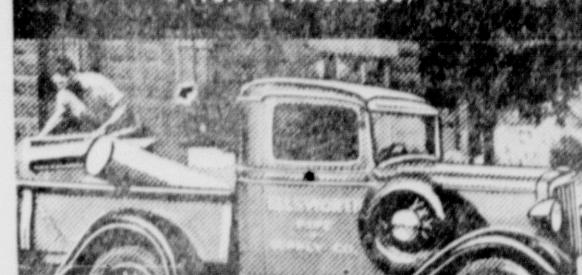

Billy Beauhiful, rugged St. Louis lightweight, slammed his way to the third round by the knockout route. He used a stout right to put away Snokey Brill, Erie, Pa., in the second round after scoring a technical knockout over Maureen Boulier, Omaha's faded contender.

Joining Cirimelli and the homeowner in the advance to the he third round were: Mike Piskin, Freehold, N. J., lightweight; Paul Spica, St. Louis, featherweight; Lorenzo Lovings, Chicago 135 pounder; Al Manzini, Providence, R. I., flyweight; and Herman Wright, Chicago lightweight.

**SILVERITES NOT
SATISFIED WITH
BOOSTED PRICES**

Roosevelt's Action in
Raising Price Fails to
Sop Agitation

BULLETIN

Washington, April 11—(AP)—The Senate agriculture committee today approved the Wheeler mandatory 16 to 1 silver purchase bill designed to inflate the currency and speed the attainment of a metallic currency reserve of one part silver and three parts gold.

The bill by Senator Wheeler (D. Mont.) however, faces a doubtful future in the senate.

Democratic leader expressed confidence it would not pass, but Wheeler claimed to have gained votes since the test on the issue last session.

Washington, April 11—(AP)—With the silver movement in congress getting up steam again, the Capital watched today to see whether President Roosevelt's proclamation boosting the price of newly mined domestic silver 6 1/2 cents would check or accelerate the drive for more far-reaching action in behalf of the white metal.

Though some quarters saw in the action a possible attempt to head off other monetary moves, some emphasized that it developed from the fact that the world price for silver had approached to within a fraction of 64 1/2 cents, the price the treasury has been paying for newly mined metal.

Congressional silverites greeted

mean an ultimate price of \$2.18 an ounce for the white metal.

Senator Thomas (D. Okla.) addressed a letter to leading economists and financiers in which he foresees early abandonment of the gold standard by those nations still on it, with the subsequent stabilization of world currencies on a bimetallic standard—silver and gold.

Deny Any Inflation

A rapid rise in the world price of silver preceded the president's proclamation. Officials held the belief that this rise could be attributed to United States buying of silver under the policy laid down by congress—which is to acquire the white metal until it is 25 per cent of the metal behind the currency—the other 75 being gold.

Most experts held that inflationary potentialities in the boost in the treasury's price of 71 cents were slight—if any. They said the amount of newly mined domestic silver plays a comparatively small part in the whole picture.

Pre-Easter Services
at Christian Church

The rain of last evening affected attendance at the Pre-Easter evangelistic services at the Christian church. But the interest manifested in the meeting was good and everyone joined heartily in the praise service led by Mrs. Ora Tice. Mrs. Tice favored the audience with a gospel solo, "Why Did He Love Me So?" which was greatly appreciated. There was a baptismal service at the close.

Tonight, Rev. Barnett will preach upon, "The Beginning of Our Redemption." He will consider such questions, as "Why Abel was called a Prophet? What was back of Cain's sin? Where did he get his wife? Why the altar?"

Services continue nightly at 7:30 over Easter.

Reminiscences

Little Rock, Ark., April 11—(AP)—Honus "Hans" Wagner—a diamond luminary of the old school who knows what he's talking about—is of the opinion that "baseball today is better than it ever was."

Wagner is coach of the first and only major league club he ever received a check from, the Pittsburgh Pirates. And he talked about baseball—between chew of tobacco—while waiting here for the Pirates to meet the Chicago White Sox in an exhibition game this afternoon.

Recalling that during baseball's pioneer stages "there were 10 roughnecks to every gentleman," Wagner said today it was just the reverse and that every day "one sees true examples of sportsmanship" on the diamond.

The 61-year-old coach, who played every position except pitcher and catcher with the Pirates, did say smiling that "they used to be bigger and lots tougher."

"In my day, the motto was to win at any cost," he declared.

The President's action in boosting the price to 71 cents with satisfaction, but apparently were not excited over it. They went right ahead with more sweeping plans.

Wheeler Seeks 16 to 1

Senator Wheeler (D. Mont.) was hoping to obtain favorable action, possibly today, by the senate agriculture committee on his bill for the free coinage of silver at the ratio of 16 to 1 with gold. This is the old Bryan formula and, on the basis of the present price for gold, which is \$35 an ounce it would

help to obtain favorable action, possibly today, by the senate agriculture committee on his bill for the free coinage of silver at the ratio of 16 to 1 with gold. This is the old Bryan formula and, on the basis of the present price for gold, which is \$35 an ounce it would

Mr. and Mrs. Frank Franks and family and Fred Steffie of Love's Park were guests Sunday of Mr. and Mrs. Lewis Fouch.

Oregon Garden Club was entertained Monday afternoon at the

PLAY'S the THING!

A Preview of Summer Toys

Like the circus, playthings, shown at the opening of the American Toy Fair, are bigger and better than ever this year. Here are some of the newest creations the manufacturers are playing around with in hopes that you'll loosen the purse strings to make your Jack and Jill happy. How the teeter-totter has resisted streamlining innovations is

shown in the new model at left. Lightweight yet sturdy, the children will follow it out-of-doors, on sunny days, and they'll love the slide in the background, too. At right the toy makers show their imaginative abilities, making tricycle and automobile look swankily up-to-the-minute as adult vehicles. Both are ideal open air toys for the quite young.

home of Mrs. A. I. Maxwell, assisted by Mrs. John Sverkerson

Charles G. Gilbert was the speaker and his topic "Making Gardening Easier."

Mrs. Inez Narum of Oak Park spent the week end with her sister, Mrs. Claude Allen and husband, called here by the death of her brother, Ray Cross. She returned home Tuesday.

IN CHINA...
WHEN THE FIRST RAILROAD FATALITY OCCURRED, THE WHOLE RAILROAD WAS TORN UP AND JUNKED.

Easter was the goddess of light, or spring. Many of the popular Easter observances are of pagan origin, and Christian significance has been given to such of these rites as could not be rooted out.

NEXT: How is the date of Easter determined?

The DARK BLOND

by CARLETON KENDRAKE

© 1935 NCA SERVICE INC.

BEGIN HERE TODAY
MILICENT GRAVES, secretary to GEORGE DRIMGOLD, finds her employer in his office dead. Millicent, who had been to the office which Drimgold had begun to dictate a confession, in panic she rushes away, registers at a hotel under an assumed name.

JARVIS, a P.I., offers to help her. He sends her to a beauty shop where she is transformed into a blonde, then takes her home. Intrigued, he asks his secretary, who meets Happ's son, NORMAN, his stepson. ROBERT CAISE; and MRS. HAPPI.

That night a note is sent her door informing her, "The woman in black uniform is here." Millicent sees the woman in black drive away and follows in Robert Caisse's car. She runs out of gas. She walks home, enters the chauffeur's quarters and finds him dead.

Next morning, a question. Millicent, who has become panic-stricken and decides to run away. She is stopped by Mrs. Happ who shouts, "Arrest that woman!"

NOT GO ON WITH THE STORY
CHAPTER XXV
SERGEANT MAHONEY stepped forward and said, "Just a minute, Mrs. Happ. What is it you were trying to say?"

"This girl," she said, pointing to Millicent, "is the one who threw the keys into the pond at the base of the fountain."

"How do you know?"
"I saw her."

"Are you willing to swear that you saw her throw the keys?"
"Well, I saw her leaning out of the window, and there was a splash in the fish pond."

"Did you see her leaning out of the window before or after the splash?"
"Look here," she said in her most imperious manner, "you can't cross-examine me in this way. I'm telling you what I saw, and I don't want my word questioned."

"I'm not questioning your word," Sergeant Mahoney told her. "I'm only trying to get at the facts of the case. Now, where were you when this happened?"

"I was in the yard."
"Did you see her lean out of the window before or after the splash?"
"It was afterwards."

"You heard the splash?"
"And then what did you do?"
"Then I looked up and saw this young woman leaning out of the window."

"How did you know she had thrown the keys into the pond?"
"I felt certain of it."

"Why?"
"Because of the expression on her face and because I had reason to believe she was the one driving Bob's coupe last night."

"What were your reasons for thinking that?"
"Because her clothes were muddy."

"Who told you that?"
"Vera Duchene, my maid."

Sterlingites Help Brethren Services Here Last Evening

The drenching rain last night did not hinder a fine enthusiastic audience from attending the revival at the Brethren church. The delegation from the Sterling Brethren church also added much to the spirit of the service. Their male quartet, Levi Kuhfner, Harvey Conrad, O. A. Fackler, and Henry Brubaker sang two numbers and a duet. Helen Myers and Betty Conrad sang to the delight of every one present. The good things were not all contributed by visitors as the Krug sisters sang one of their good numbers that always inspires their audience. The sermon was given by the Rev. Ezra Flory, pastor of the Sterling Brethren church and in his own unique and dramatic way pictured the love of God which sent the Son Jesus Christ to redeem the world from the sin that held mankind in darkness of superstition, ignorance and sin.

Tonight the Rev. G. L. McClanahan, pastor of the United Brethren church, known as the East Jordan church will give the sermon. The public is invited to attend and enjoy these services.

The President's stand spurred the cotton textile group—at least the northern section—to belligerency. Lincoln Baylies, spokesman for the policy committee of the northern mills, asserted that "the industry has only begun to fight."

Senator Walsh (D. Mass.) commented that "we'll have to carry on and continue our fight," while Representative Martin (R. Mass.) remarked that "we're not discour-

aged at losing the opening skirmish," and Representative Rogers (R. Mass.) said grimly that "we still have a few tricks up our sleeves."

At Fever Heat

The President's statement brought to fever heat an already controversial situation. The cotton industry, supported vigorously by members of Congress from mill communities, has contended that the tax, plus increased labor costs under the NRA, and imports from Japan was threatening destruction of the industry.

Complicating the situation was the north-south controversy over present wage differentials now favoring the south. After some hesi-

ation on the question of whether to proceed at once with the wage equalization program, the northern group apparently had decided today to press firmly along this front, also, with southern opposition assured.

A plane now on the market has

inverted type in-line engine in

which the cylinders hang below the crankcase to avoid extension into the air stream.

On January 1 a simplified system of airport classification was put into effect, providing that only airports serving scheduled interstate airlines be inspected for compliance with Bureau of Air Commerce requirements.

Their Prayers Ride With Campbell

Washington, April 11—(AP)—A new and bitter conflict over the cotton processing tax was in the making today. After President Roosevelt had made plain that he had no intention of removing the tax by paying farmers out of the \$4,800,000,000 relief fund, the cotton textile industry and its congressional supporters rallied for the fight against what one spokesman termed "this crucifying levy."

The cotton manufacturers, backed by a sizable bloc in Congress, have waged a campaign toward two major objectives—removal of the processing tax and imposition of quotas or an embargo to shut out increasing imports of low-cost Japanese cloth.

At Disadvantage

The manufacturers had hoped that the processing tax might be lifted through the George amendment to the work relief bill. This empowered the President, if he wished, to use relief money to pay farmers for cutting acreage. At present the processing tax, which critics contend places American cotton goods at a disadvantage by raising prices, is used for this purpose.

The President's stand spurred the cotton textile group—at least the northern section—to belligerency.

Lincoln Baylies, spokesman for the policy committee of the northern mills, asserted that "the industry has only begun to fight."

Senator Walsh (D. Mass.) commented that "we'll have to carry on and continue our fight," while Representative Martin (R. Mass.) remarked that "we're not discour-

aged at losing the opening skirmish," and Representative Rogers (R. Mass.) said grimly that "we still have a few tricks up our sleeves."

Two persons more concerned than all the rest of the world in success of Sir Malcolm Campbell's effort to set the amazing automobile speed mark of 309 miles an hour over Florida sands are shown here with the English speedster at Daytona Beach. The hopes and prayers of his English wife, Jean, left, and Lady Campbell, center, will ride with the daring pilot in his super-speeding Blue-

"BOONDOGLING" AND DANCING IN RELIEF PROGRAM

Will Be Continued; Making Jobs Problem of the Administration

Washington, April 11—(AP)—At the outset of its drive to provide jobs for 3,500,000 persons now on relief the administration today ran smack into a knotty problem—that of making work where the workers are.

Tentative plans of some new dealers to set up huge construction camps far from the cities where the relief load is heaviest apparently must be curtailed as a result of President Roosevelt's stand yesterday.

So far as possible, the president said, employment under the \$4,800,000 works fund would be provided in the localities in which the destitute jobless live. It was indicated this policy was based on a desire to avoid the expense of building worker's barracks and homes which later would have to be abandoned.

Must Develop Projects

This stand left it up to the assistants to develop more projects in populous centers where dam construction, soil erosion, reforestation, water conservation, rural electrification and the like are impossible.

One-half of the relief problem now is concentrated in eight densely populated states. The most recent relief census showed there were 3,485,000 workers in the cities all of them suited to share in the work relief program if jobs can be devised. The number of employable persons on relief everywhere was placed at 5,000,000. About 1,500,000 of these are in families which have more than one member able to work, leaving 3,500,000 to be employed in the drive now starting.

Officials expressed hope that employment furnished indirectly by the works program, to persons engaged in the manufacture and transportation of materials, would help to meet the problem faced in metropolitan areas.

Plan Series of Dams

Also, a vast long-range development of the Mississippi valley, with emphasis on a series of dams for power, navigation, flood control and prevention of soil erosion, has been suggested to employ workers on relief in Chicago, St. Louis, Kansas City, St. Paul and Memphis.

Some past efforts of the relief administration to provide jobs for unemployed "white collar" workers in cities have met with criticism. A number of projects—among them

of 16 candidates from various lodges of the district were initiated by officers of Rockford lodge. Judge

Leonard, president of the Illinois Elks association, Harry C. Warner, grand lodge officer, and several district deputies were in attendance at the meeting. The success of the gathering was largely due to the efforts of Lester Street of this city vice president of the state association and chairman of the inter-lodge relations in the northwest district.

Aerial strategists content that the fighting plane will evolve itself into a two-seater monoplane of low-wing construction. The Army Air Service has approved five types of two-seat fighters, while the navy has put its approval on two of this type.

NATIONAL CLAY COURTS CHAMP ON CUP OUTFIT

U. S. Davis Cup Team To Face China in Zone Play

New York, Apr. 11—(AP)—Bryan M. (Bitsy) Grant, the pint-sized Georgian, who for several years has been trying to win Davis Cup recognition, is slated to be a member of the American team which will meet China in a North Amer-

ican zone cup match in Mexico City next month.

The ambitious Atlantan, national clay court champion, and Frank X. Shields, third ranking star in the country, will carry the singles assignments, while Donald Budge and Gene Mako, youthful Pacific coast team, will play in the doubles. It was learned today on high authority.

The team will be announced officially within two weeks.

Wilmer Allison and Sidney B. Wood, Jr., respectively first and second ranking stars in the nation, will not make the junket to Mexico. They've played there before and dislike the rarified atmosphere.

Allison Top Flight

When the team finally is assembled for the trip abroad, however,

Allison and Wood will be top-flight members of the squad.

"Grant is entitled to consideration," said one official of the United States lawn tennis association. "After all, he's our national clay court champion and, since our matches on this continent are to be played on clay, we ought to use our best material."

Representing the United States in Mexico will satisfy only half of Grant's ambition. The other half-trip to England—appears doubtful since the berths on the overseas squad apparently are destined for Allison, Wood, Budge, Mako and Johnny Van Ryn.

The decision of Frankie Parker, Lawrenceville, N. J., schoolboy, who was seriously considered for the international competition, not to go to Europe, possibly paves the way for Shields for a place on the team next summer.

NEW CHAMPIONS IN EVERY CLASS IN ALLEY MATCH

American Bowling Congress Officials are Mailing Checks

Syracuse, N. Y., April 11—(AP)—American Bowling Congress officials tackled today the task of mailing out checks for \$93,106 to wind up the 35th annual tournament.

New champions were crowned in every division. In all, 376 five-man teams, 740 doubles combinations, 1,360 individuals and 105 all events competitors shared in the prize awards for the regular competition while 782 teams got prizes for the booster division.

Principal honors went to the Wolfe's Tire Service five of Niagara Falls, N. Y.; Don Brokaw of Canton, O., and Ora Mayer of San Francisco.

Wolfe's took the five-man title with 3,029, winning \$1,000 and five diamond-studded medals. Brokaw rolled the second highest singles score in recent tournament history with a three-game total of 733 which won him \$300 in addition to one of the diamond medals that were awarded to all winners. Larry Shotwell of Covington, Ky., who set an all-time record of 774 in 1930, is the only bowler to better Brokaw's total in the last ten years.

Mayer, the first Californian ever to win a championship, compiled an all-events score of 2,022 for nine games, the third highest in the history of the congress. Fourth in that event was Tom Rinovec of La Salle, Ill., with 1919. He won \$135.

The other new champions are Clyde Sumerix and Harry Soners of Akron, O., who took the doubles crown with 1,348.

Whistle had blown; baseball teams have come from behind to decide the issue in the ninth; and long shots have thundered down the stretch to cross the wire a winner. And here another long shot was to decide a championship.

Hole No. 15, which was played as No. 6 last year, is described in the Augusta National program as a three-shot hole. It not only is an interesting three-shot hole, as one will be maneuvering for position to the tee onward, but it also is a sporting two-shot hole.

A skillful and courageous player is able to pull his second shot around to the green with the aid of a large hillock to the right.

A pond in front of the green provides the penalty for the long player who fails to make a perfect second shot. The green is 23 feet lower than the tee.

Gene's booming drive split the middle of the fairway and came to rest on the downward slope 255 yards from the tee, but in a cuppy lie. He first took an iron from his bag, but an iron wouldn't carry the pond, more hazardous than a trap. He then selected a spoon, and smacked the ball. Away it soared, landed on the green, and dropped into the cup for a deuce, three under par, to pick up the three needed strokes for a chance to be Wood.

In the 36-hole playoff he defeated Wood by five strokes.

GREAT GOLF

SARAZEN'S DEUCE SHOT AT AUGUSTA RATED BEST IN HISTORY

By ART KRENZ
NEA Service Staff Writer.

Speaking of Great Golf, Gene Sarazens double eagle two scored on the 480 yard 15th hole during the recent Bobby Jones Masters Tournament at Augusta, Ga., is the greatest of the great.

Holes in one have been made in tournament competition by Paul Runyan, Leo Diegel, Ross Somerville, and others, but none can compare with this, the outstanding shot in the history of golf.

Granted that Gene is a strong finisher, as was proved at Fresh Meadows in 1932, when he scored 66 in the final round to snatch the National Open crown away from the waiting hands of Phil Perkins, no one conceded him a chance of catching Craig Wood as he mounted the 15th tee.

Wood finished with 72 and Gene was three strokes behind. This would necessitate shaving a like number of strokes from par, finishing in 13 strokes against perfect figures of 5-3-4-4; even then Sarazan would only tie Wood.

Wood finished with 72 and Gene was three strokes behind. This would necessitate shaving a like number of strokes from par, finishing in 13 strokes against perfect figures of 5-3-4-4; even then Sarazan would only tie Wood.

But the seemingly impossible has happened in sports. Touchdowns have been scored after the final

whistle had blown; baseball teams have come from behind to decide the issue in the ninth; and long shots have thundered down the stretch to cross the wire a winner. And here another long shot was to decide a championship.

Hole No. 15, which was played as No. 6 last year, is described in the Augusta National program as a three-shot hole. It not only is an interesting three-shot hole, as one will be maneuvering for position to the tee onward, but it also is a sporting two-shot hole.

A skillful and courageous player is able to pull his second shot around to the green with the aid of a large hillock to the right.

A pond in front of the green provides the penalty for the long player who fails to make a perfect second shot. The green is 23 feet lower than the tee.

Gene's booming drive split the middle of the fairway and came to rest on the downward slope 255 yards from the tee, but in a cuppy lie. He first took an iron from his bag, but an iron wouldn't carry the pond, more hazardous than a trap. He then selected a spoon, and smacked the ball. Away it soared, landed on the green, and dropped into the cup for a deuce, three under par, to pick up the three needed strokes for a chance to be Wood.

In the 36-hole playoff he defeated Wood by five strokes.

Whistle had blown; baseball teams have come from behind to decide the issue in the ninth; and long shots have thundered down the stretch to cross the wire a winner. And here another long shot was to decide a championship.

Hole No. 15, which was played as No. 6 last year, is described in the Augusta National program as a three-shot hole. It not only is an interesting three-shot hole, as one will be maneuvering for position to the tee onward, but it also is a sporting two-shot hole.
